Chapter 1 ablations — within subject, leave-one-session-out
p < 0.05 (Wilcoxon)
n.s.
Using averages directly
distillation from averaged-trial teacher
averaged trials as extra training data
RED components
reconstruction of averaged repetitions only
frozen critic only
RED (averaged-trial critic)
RED (single-trial critic)
Controls
random frozen critic
class-mean target
input trial as target, λ = 0.3
input trial as target, λ = 1
latency-aligned targets
